

GET INDUSTRY READY

Health, Safety and Environment Courses
for the new age Engineer

We bridge the gap between
you & the perfect job the day
you step out of college

Bridging the gap between Education and the Future Workforce

There is no better time to get ready for your future career than while you are in college. Although some college graduates will find their first, degree-related job right out of college, it's not the case for most.

Students and colleges think they are doing enough, but the numbers tell a different story. It's a major problem for businesses that want to hire employees that can hit the ground running, especially considering the amount of competition many companies face today. Organizations are hiring today based upon the candidates demonstrated ability.

But Universities are only partially at fault. The truth is that rapid changes have made it difficult for educational institutions to adapt and, in turn, have created a disconnect between higher education and the workforce. A formal college education can never be dispensed of with, the solution is to supplement formal education with Industry relevant education from someone operating in the Industry.

With our two decades of experience in HSE and Risk Engineering, we are the best equipped to give you the right insights to what your future employers will require from you in terms of safety skills.

Only 7% engineering graduates employable: What's wrong with India's engineers?

— as per a study published in 2016, by A New Delhi-based employment solutions company, Aspiring Minds, based upon an employability-focused study involving 150,000 engineering students.

Stay Relevant

FOR ENGINEERING STUDENTS

As a student you can enhance your knowledge by enrolling for our online courses available on our learning portal.

These are 90 minute courses and come with an online assessment leading to a certificate from the Chola Safety Academy

POPULAR E-TITLES

- Fundamentals of QRA
- Safety in Pre-commissioning
- Layer of Protection Analysis
- Confined Space Entry
- Principles of Electrical safety
- Understanding hazardous area classification
- Selection of Ex equipment for HAC Zones
- Lockout & Tagout Safely
- Safe Scaffolding
- Working at Height
- Welding, Grinding, Gas cutting safety
- Material Handling
- Excavation and Trenching Safety
- Electrical safety at Site

FOR ENGINEERING COLLEGES

We encourage you to partner with us to build industry relevant knowledge in your students.

You can choose to buy these courses available in DVD form for your education library. You can also invite us to offer short duration courses [2-3 days] in areas like Process Safety, General Safety, Electrical Safety, Functional Safety, Construction safety as short duration Classroom training session at your college premise...like the one given here on the Fundamentals of PSM

LEARN THE FUNDAMENTALS OF PROCESS SAFETY

Safety Expert Talks

Topics include:

- ◆ Safety and loss prevention
- ◆ Fires and explosion
- ◆ Designs to prevent fire and explosion
- ◆ Hazard identification
- ◆ Accident Investigation
- ◆ Analysis of Accident Case Histories
- ◆ Risk Assessment: Theory, Event Tree, Fault trees
- ◆ Risk Assessment : Toxic Release and Dispersion Models
- ◆ Process Safety Management
- ◆ Asset Integrity Management

*Course on Introduction to Process Safety has been approved by the Board of Studies, IIT Madras.

***For students only : any 5 courses at 3500/- only**

About us

Cholamandalam MS Risk Services Limited is a joint venture between the Murugappa group, India and Mitsui Sumitomo Insurance Group (MSIG), Japan, with a technical collaboration with InterRisk (Risk Management arm of MSIG). With an experience of over two decades, we specialize in risk management services & assisting businesses in assessing various risks through a highly structured review process. Through our strategic partnership with Arcadis - a global leader in design, engineering & consultancy and association with Inogen, our services are designed to suit a wide spectrum of sectors, extending technical assistance & delivering quantifiable results that lead to effective risk mitigation measures. Headquartered in Chennai with global footprints, we offer best in class safety engineering solutions.

We are a leading provider of professional training and education in Risk Engineering and Safety Management. Our training modules are based upon a number of years of cumulative experience of our domain experts and engineers.

*Our consulting experience and up-to-date knowledge about the statutory regulations, standards etc. form the basis of our programs. These learning modules are **meticulously developed by our domain experts in consultation with Instructional designers to ensure maximum learning and retention of concepts learnt in the least amount of time.***

We have a passionate team of trainers and consultants, who have the combined experience of delivering more than 5000 classroom training hours across the globe. All of whom are very experienced in the delivery of training modules and can bring out the best outcomes and participation.
